

## Swine Feeding Systems

- ✓ **EFFICIENT**
- ✓ **PRECISE**
- ✓ **RELIABLE**

### WE WERE SWINE PRODUCERS FIRST

We know what you go through everyday because we have been pork producers for 3 generations! The Lefebvre brothers, owners of Jyga Technologies, also own a 2200 sow farrow-to-finish unit.

### OVER 30 YEARS OF EXPERTISE

In 1994, Jyga Technologies became the first company to ever design and manufacture electronic feeding systems, ensuring all your sows maximize intake and giving you great results.

### QUALITY PRODUCTS

With GESTAL, you opt for strong & durable products engineered for pork producers, by pork producers! Certified Nema 4X and IP66: our products reach the highest quality standards.

### WIRELESS PRODUCTS

Our products are 100% autonomous and standalone, so that no serial connections can paralyze your whole feeding system in case of a system break down.

### OUTSTANDING SERVICE

From installation through remote or on-site assistance, our skilled technical team ensures uninterrupted feeding for your sows and optimal use of our systems.

### CONTINUOUS INNOVATION

We continuously improve our products by aligning with producers' needs, industry standards and scientific advancements to offer optimal solutions.
